GREENHOUSE MANUFACTURING CO.

Introducing The Trillium Greenhouse

A “greener” type of greenhouse...

The Trillium is made with a special Redwood material - small pieces of redwood are glued and fused into longer, stronger components - similar to a laminated beam. Using redwood shorts helps save trees and reduces our carbon footprint.

Our unique laminated redwood frame uses All Clear Heart Redwood, the part that is truly “red”, for superior durability and rot resistance. This greenhouse will last and look beautiful for years!

The Trillium greenhouse kit uses standard window glass in the walls and twin wall polycarbonate in the roof for strength, energy efficiency and great light diffusion.

Sturdi-built Greenhouses has been building high-quality greenhouse kits in Portland, Oregon for 50 years. We use only American grown and made materials.

11304 SW Boones Ferry Rd., Portland, OR 97219
Office hours: M-F 8am to 4:30pm, weekends by appt.
503-244-4100 or 800-334-4115
